

Label Applicators

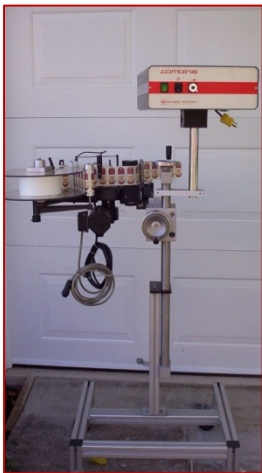

Combina label applicators are designed to meet the highest labeling demands for the increasing requirements of the market with regards to performance, quality, precision and security.

Features:

- Precise, high-performance labeling
- Modular concept design can be employed for all labeling tasks (wraparound, top, bottom, front and back labeling)
- Made of high-value, rust-resistant materials such as stainless steel and aluminium
- Intelligent control for integration into production and packaging processes
- Can be adapted to individual customer requirements
- Checking devices corresponding to pharmaceutical standards

Cost effective solutions, outstanding quality and reliability!
